

# Diver personal skills development pathways

Following the achievement of basic diving skills, there are three areas for personal diver development:

- Dive Management – to organise and manage safe diving for groups of different skill levels
- Technical Diving – to extend one's diving range with personal skills that include rebreathers and Trimix
- Instructor – to teach safe diving practices to new and qualified divers (see following page)

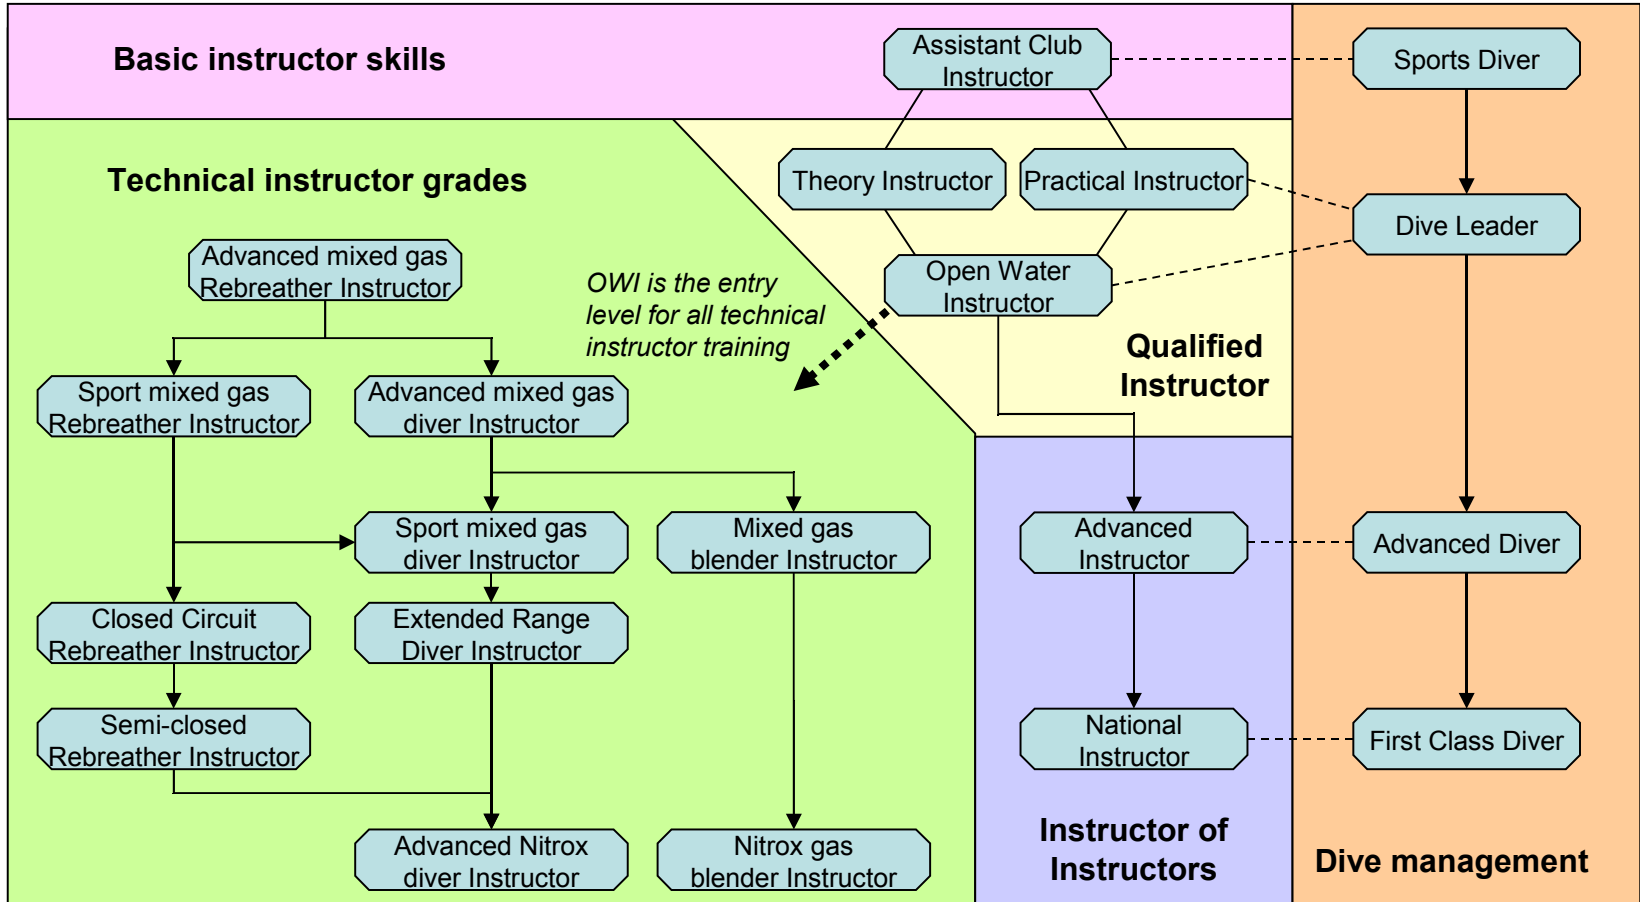

Note that Advanced Nitrox is the entry qualification for all technical diver training

# Diving Instructor skills development pathways

Following the achievement of basic instructor skills, there are three areas for personal diver development:

- Qualified Instructor – to teach safe diving skills in the classroom, pool and open water
- Technical Instructor – to teach safe diving practices for specialist technical skills
- Instructor of Instructors – to teach new instructors and develop instructor skills in qualified instructors

Note that Open Water Instructor is the entry qualification for all technical instructor training
